

John R. Sims II
Director of Neurocritical Care
Massachusetts General Hospital

Biography:

John R. Sims II is an Assistant Professor of Neurology at Harvard Medical School and the Director of Neurocritical Care at Massachusetts General Hospital in the Departments of Neurology, Neurosurgery and Radiology. John is involved in basic and clinical research oriented towards understanding brain injury, recovery and repair. John has worked in collaboration with Martin Schmidt, of MIT, on the design of implantable accelerometers for detection of nervous system injury and recovery. John will take a new position in the late fall of 2009 as the Medical Advisor to the Neuroscience Division, Development Phase at Eli Lilly in Indianapolis.
